

ISYS90077 2019 - Assignment 1 - instructions

Handbook description:

“One report on a technical review of a specific category of current eHealth solutions (30%) of approximately 1000 words due in week 6, requiring 40-45 hours of work.”

Overview

Write a report describing:

1. The opportunity for design that was identified in discussion with your client:
 - a. A health condition that is amenable to technological intervention
 - b. Prospective users and other stakeholders (about 2 to 4 personas)
2. A category of existing eHealth solutions that address this opportunity:
 - a. Choose a sample of two to four *existing* solutions that address this condition: for example, a leading solution, an innovative solution, etc.
 - b. For each, describe the solution, why you chose it, the function(s) it performs, and any shortcomings it has.
3. Opportunities to innovate:
 - a. In which ways do existing solutions fail to fully address the condition?
 - b. Present a high-level (conceptual) design of an imagined future technology that could better address the condition.

Submission details

To be completed by	Your assignment group
Due date	Week 6 – Friday 12 th April by midnight
Assessment weighting	30%
Word limit	1000 words
Document format	PDF
Submission	via LMS

Assessment criteria

Your response to each heading above will be marked out of 10, yielding a total of 30%.
