

ISYS90077 2019 – Assignment 3 - instructions

Handbook description:

One written evaluation of other students' eHealth solutions (20%) of approximately 1000 words due in week 12, requiring approximately 25-30 hours of work.

Overview

Review another group's technology design (the prototype they submitted for Assignment 2).

Use the *Mobile App Rating Scale* (MARS) to quantitatively rate the technology.

Write a report, critiquing the design with respect to the following criteria:

1. Present the results of your MARS test
(also scan your MARS worksheet and include it as an appendix)
2. Identify and describe the highlights of the design
3. Recommend ways in which the design could be improved
4. Comment on how well MARS worked for your evaluation: How would you change it?

A note about peer review

Peer-review helps you learn by critiquing someone's else's work and receiving criticism of your own work. It is integral to scientific and professional life. It consists of constructive and creative suggestions for improvement. Your work is *not* being marked by other students; nor will your critique affect any other student's mark.

Submission details

To be completed by	Individual students
Due Date	Week 12 – Friday 31 st May by midnight
Assessment Weighting	20%
Word limit	1000 words
Document format	PDF
Submission	via LMS

Assessment criteria

Your response to each of the 4 numbered headings above will be marked out of 5, yielding a total of 20%.
